Alon Goldstein, piano

Goldstein-Peled-Fiterstein Trio

Bound by their Israeli roots, the Goldstein-Peled-Fiterstein Trio formed in 2005. Today, the ensemble's performances reflect both the special gifts and originality of the three artists as soloists as well as their marvelous sense of ensemble and love of chamber music.

Alexander Fiterstein, clarinet

Clarinetist **Alexander Fiterstein** is recognized for playing that combines flawless technique and consummate musicianship with graceful phrasing and a warm, soulful tone. A recipient of the 2009 Avery Fisher Career Grant Award, first-prize winner of the Carl Nielsen International Clarinet Competition, and the Young Concert Artists International Auditions, he has appeared with the Orchestra of St. Luke's at Lincoln Center, Vienna Chamber Orchestra, Polish Kammerphilharmonie, and many others. Mr. Fiterstein is professor of clarinet at the Peabody Institute of the Johns Hopkins University.

Alon Goldstein, piano

Pianist **Alon Goldstein** is admired for his musical intelligence and dynamic personality. Recent highlights include appearances with the Indianapolis Symphony at the Prokofiev Festival performing the composer's Piano concerti nos.1 and 4, as well as a 17-concert Latin American tour with the Israel Chamber Orchestra. He serves as Artistic Director of the Lieven Piano Foundation's summer school in Vienna, as well as Artistic Director of the Abbey Bach Festival in Oregon, and Co-Director of The Distinguished Artists Concert & Lecture Series in Santa Cruz, California. Mr. Goldstein created the Emerald Coast Music Alliance, whose annual festival in Florida is devoted to sharing the beauty of classical music to under-served communities, at no charge. He holds the position of Strandberg/Missouri Endowed Chair and Visiting Professor at the University of Missouri-Kansas City.

Amit Peled, cello

Israeli-American cellist, conductor, and pedagogue **Amit Peled**, a musician of profound artistry and charismatic stage presence, is acclaimed worldwide as one of the most exciting and virtuosic instrumentalists on the concert stage today. Mr. Peled is founder of the Amit Peled Cello Gang, a touring group composed of students from his studio at the Peabody Institute, as well as conductor and artistic director of the Mount Vernon Virtuosi, a chamber orchestra dedicated to launching the careers of recently graduated students. He is a founding member of the Tempest Trio and Goldstein-Peled-Fiterstein Trio. Mr. Peled performs on an 1800 Thomas Dodd cello.

THE ROCKEFELLER UNIVERSITY

The Rockefeller University is one of the world's foremost institutions dedicated to research and graduate education in the biomedical sciences, chemistry, and physics. Founded by John D. Rockefeller, Sr. in 1901 as The Rockefeller Institute for Medical Research, it was the first institution in the United States devoted exclusively to biomedical research. In the 1950s, the institute expanded its mission to include graduate education. It was renamed The Rockefeller University in 1965.

The university's laboratory-based structure encourages collaborations between disciplines and empowers faculty members to take on high-risk, high-reward projects. No formal departments exist, bureaucracy is kept to a minimum, and scientists are given resources, support, and unparalleled freedom to follow the science wherever it leads.

The Rockefeller University Community

- 70 heads of laboratory
- 200 Ph.D. and M.D.-Ph.D. students
- 200 research scientists
- 1,355 alumni
- 300 postdoctoral investigators
- 1,325 support staff

Acclaimed Scientists

In the course of Rockefeller's history, 26 of its scientists have been awarded the Nobel Prize, including 7 in the last 22 years alone; 25 have received the Albert Lasker Medical Research Award; and 20 have garnered the National Medal of Science, the nation's highest scientific honor.

At Present, the Scientific Staff at Rockefeller Includes

- 5 Nobel laureates
- 8 recipients of the Albert Lasker Medical Research Award
- 36 members of the National Academy of Sciences
- 4 recipients of MacArthur Fellowships
- 5 recipients of the National Medal of Science

Some Clinical Concerns under Study

- Aging
- Alcoholism and drug addiction
- Alzheimer's disease
- Antibiotic resistance
- Autism
- Cancer
- COVID-19
- Diabetes
- Heart disease and stroke
- Hepatitis
- HIV/AIDS
- Multiple sclerosis
- Obesity, nutrition, and weight loss
- Parkinson's disease
- Skin diseases
- Vaccine development
- Vision and hearing disorders

The Rockefeller University Hospital

Established in 1910, The Rockefeller University Hospital was the first hospital in the nation dedicated exclusively to patient-oriented investigations. Patients at the hospital are participants in clinical studies that build on basic research findings from Rockefeller laboratories. This allows the university to maintain an unbroken spectrum of research, from basic to clinical.

Groundbreaking Accomplishments

Among the pioneering discoveries at Rockefeller are many seminal advances that have transformed science and reduced human suffering. Scientists at Rockefeller:

- Discovered that DNA is the basic material of heredity
- Developed the influenza vaccine and vaccines against meningitis
- Determined that cancer can be caused by a virus
- Discovered blood groups and ways to preserve whole blood
- Isolated and first successfully tested natural antibiotics
- Developed methadone maintenance therapy for people addicted to heroin
- Developed the AIDS "cocktail" drug therapy
- Showed that an adult brain of a higher species can form new nerve cells
- Discovered an obesity gene and the weight-regulating hormone leptin
- Discovered the dendritic cell, a key regulator of the immune system
- Discovered the molecular mechanisms controlling circadian rhythm
- Developed assays that paved the way for drugs that cure hepatitis C

An Exceptional Place to Learn

Rockefeller's Ph.D. program offers training in the biomedical and physical sciences. With neighboring Memorial Sloan Kettering Cancer Center and Weill Cornell Medicine, the university also offers one of the nation's top M.D.-Ph.D. programs. In addition, Rockefeller provides intensive postgraduate training. At any one time, some 300 postdoctoral investigators conduct research in university laboratories. Rockefeller's acclaimed Clinical Scholars Program, a three-year master's degree program, provides a unique opportunity for recent M.D. or M.D.-Ph.D. recipients to begin careers in patient-oriented research. Working with senior faculty members, clinical scholars develop and implement translational research studies at The Rockefeller University Hospital.

Infrastructure that Fosters Collaboration and Interaction

Rockefeller invented the modern bioscience institute, and has spent the past 120 years perfecting it. The university's beautifully landscaped 16-acre campus includes nine research buildings containing roughly 500,000 square feet of lab space, where investigators employ the latest technology to answer the most challenging questions in their fields. The recently completed Stavros Niarchos Foundation-David Rockefeller River Campus, featuring the Marie-Josée and Henry R. Kravis Research Building, provides a number of new amenities, including additional cutting-edge lab space, a river view dining commons, academic and conference centers, and magnificent rooftop gardens.

The Rockefeller University is an independent, nonprofit institute that relies on a broad base of government and private support to advance its mission of biomedical research. Each year, a committed group of individuals, foundations, and corporations helps to fund the university's scientific and educational programs.
