Spanish Brass
Trumpets, French horn, trombone, tuba

TUESDAY, JANUARY 16, 2024   |   7:30 P.M.
CASPARY AUDITORIUM

For more information about the concert series, please contact:
Samantha Tuly • The Rockefeller University • 1230 York Avenue • New York, NY 10065
212-327-8966 • stuly@rockefeller.edu • www.rockefeller.edu/peggy
Program

Johann Sebastian Bach (1685-1750)
Sheep May Safely Graze, from Cantata BWV 208 (arr. Carlos Benetó)

Georges Bizet (1838-1875)
Carmen Miniature (arr. Thierry Caens)

Louis-Claude Daquin (1694-1772)
Le Coucou (arr. Thierry Caens)

Charles Chaplin (1889-1977)
Chaplin Suite (arr. Thierry Caens)

Gerónimo Giménez (1854-1923)
La Boda de Luis Alonso (arr. Francisco Zacarés)

INTERMISSION
(15 minutes)

Isaac Albéniz (1860-1909)
Asturias (arr. Maxi Santos)

Manuel de Falla (1876-1946)
Nana (arr. Carlos Benetó)
Farruca (El Sombrero de Tres Picos) (arr. Pascual Llorens)

Émile Carrara (1915-1973)
Mon Amant de Saint Jean (arr. Thierry Thibault)

Astor Piazzolla (1921-1992)
Oblivion (arr. Thierry Caens)
Libertango (arr. Thierry Caens)

Lee Morgan (1938-1972)
The Sidewinder (arr. Jesús Santandreu)

Trad./Adam Rapa (b.1980)
The Bulería pa Spanish Brass

Program and personnel subject to change.
As a courtesy to the artists, please remain seated until they have left the hall.
Spanish Brass appears by arrangement with Lisa Sapinkopf Artists

Featuring

Spanish Brass

Carlos Benetó, Trumpet
Juanjo Serna, Trumpet
Manuel Pérez, French Horn

Inda Bonet, Trombone
Sergio Finca, Tuba

Founded in 1989 by five Spanish musicians as an innovative project that quickly gained world renown for performances, educational activities, and creative collaborations, Spanish Brass is one of the most dynamic and sought-after brass groups on the international musical stage. The group won the First Prize in the 1996 Narbonne (France) International Brass Quintet Competition, the most prestigious event of its kind in the world. In 2017, they earned the I Bankia Music Talent Award in Spain for the most influential musical artists. In 2019, they received the Espai Ter de Música Award, and the group most recently won the Spanish National Music Award in 2020.

Spanish Brass has participated in some of the most prestigious venues and festivals in the world. They performed at the gala for the Prince of Asturias Awards in 1995 and have recorded music for the play La Fundación by Buero Vallejo, at the Centro Dramático Nacional, as well as the score for the film Descongélate by Félix Sabroso, produced by El Deseo.

Alongside their activities as performers, Spanish Brass has been at the forefront of international music education. The band teaches courses and master-classes with the Spanish National Youth Orchestra, the Youth Orchestras of Catalonia, Valencia, Andalucía, and Madrid, the Hong Kong Academy for Performing Arts, Trumpet Lounge (Japan), the Showa School for Performing Arts (Japan), Lieksa Brass Week (Finland), the Eastman School of Music, University of Georgia, Venezuelan Youth Orchestra, Dartington International Summer School (England), International Winter Music Festival of Brasilia (Brazil), and Ibero-American Cultural Festival (Puerto Rico). They currently teach at the Berklee College of Music campus in Valencia and at the Universidad Europea in Madrid.

International in scope, Spanish Brass also organizes two festivals devoted to brass instruments: the Festival Spanish Brass Alzira and the Brassurround, where some of the most prestigious international brass soloists, groups, and teachers gather every year.

Spanish Brass is supported by:
Johann Sebastian Bach
One of the towering geniuses in the history of the arts, Bach produced a phenomenal amount of great music throughout his life. Wagner called him “nothing less than the most stupendous miracle in all music.” Bach can evoke the full range of emotions, and crystallize them in structural forms as intricate as their spiritual content is profound. The aria Sheep May Safely Graze, originally written for soprano, two flutes, and continuo, is the best known section of the cantata Was mir behagt, ist nur die muntre Jagd (The lively hunt is all my heart’s desire). It is sung by the character Pales, a goddess of crops, pastures, and livestock. Spanish Brass member Carlos Benetó, who made this arrangement for the group, says he was inspired by pianist Khatia Buniatishvili’s performance of an arrangement by Egon Petri. Like Jesus, Joy of Man’s Desiring, Sheep May Safely Graze is frequently played at weddings. However, the cantata of which it forms a part was originally written for a birthday celebration, that of Christian, Duke of Saxe-Weissenfels. Bach is known to have used the music again for other celebrations, but it remained unpublished until after his death.

Georges Bizet
The plot of the opera Carmen tells of a beautiful Gypsy girl, Carmen, who seduces the soldier Don José, stealing him away from his fiancée Micaëla. Don José is besotted by the beguiling Gypsy and, pledging his love, deserts the army to be with her. Carmen’s love is more fickle, and she soon tires of him, transferring her attentions to the famed bullfighter Escamillo. On the day of the bullfight, Don José begs Carmen to come back to him. When she refuses, he stabs her in the heart, and while the crowds cheer the Escamillo’s victory in the ring, Carmen dies. The plot’s perceived immorality and exploration of sexual desire met with fierce disapproval from critics and audiences alike at its premiere in Paris. This may seem hard to believe given the affection with which Bizet’s opera is now regarded. Despite encouragement and praise from both Saint-Saëns and Massenet, Bizet lamented his “definite and hopeless flop” and quickly fell ill. Tragically, he was never to see the eventual triumph of his opera; three months after its disastrous premiere, he died of a heart attack. Tchaikovsky rightly predicted Carmen’s meteoric rise, writing, “I am convinced that in ten years time, Carmen will be the most popular opera in the world.” Carmen Miniature is a wonderful arrangement by Thierry Caens, in which he takes us on a tour through the opera’s main themes.

Louis-Claude Daquin
Louis-Claude Daquin was a French composer of Jewish ancestry who wrote in the Baroque and Galant styles. A child prodigy, he performed for the court of Louis XIV at the age of six, and conducted his own choral music at the age of eight. A dazzling performer, his great expertise at the harpsichord and organ drew large crowds to hear him. Le Coucou (The Cuckoo) is among his most famous works.

Program Notes

Charles Chaplin
In this medley, the French trumpet player and arranger Thierry Caens used the following music from films by Charlie Chaplin: “Titine” and “Smile” from Modern Times, “The Flower Girl” from City Lights, “Deux petits chaussons” (Two little slippers) from Limelight, and “Ballet of the Bread Rolls” from The Gold Rush.

Gerónimo Giménez
Gerónimo Giménez was a child prodigy violinist who went on to become a leading composer and conductor. He took a special interest in the zarzuela, a form of Spanish opera, and as such his music is noticeably influenced by Spanish folk songs and dances. Giménez wrote La Boda de Luis Alonso (Luis Alonso’s Wedding) as a sequel to his previous zarzuela, El baile de Luis Alonso. Both are about the celebrated Spanish dancer and teacher, Luis Alonso. They are among Giménez’s most famous compositions (and among Spain’s most popular zarzuelas).

Isaac Albéniz
Born in Camprodon, Catalunya, Albéniz was a child prodigy who first performed at the age of four. At age seven, he passed the entrance examination for piano at the Paris Conservatoire, but was refused admission because he took out a ball from his pocket and broke a glass window while playing with it. At twelve, he stowed away on a ship to South America and began a life of touring and performing in Argentina, Uruguay, Brazil, Cuba, Puerto Rico, and eventually the United States, where he appeared in a vaudeville act playing piano behind his back. He finally settled in Paris, where he became close friends with the major impressionist composers. Asturias is the 5th movement of Suite Española. It is most famous these days as a classical guitar piece, even though it was originally composed for piano.

Manuel de Falla
Manuel de Falla was the most distinguished Spanish composer of the early 20th century. His music achieved a fusion of poetry, asceticism, and ardor that represents the spirit of Spain at its purest. Nana is a lullaby from the Siete Canciones Populares Españolas (“Seven Spanish Folksongs”), a set of traditional Spanish songs originally composed in 1914 for soprano and piano. It is de Falla’s most-arranged composition, and one of his most popular. Farruca, or The Miller’s Dance, is from The Three-Cornered Hat, originally written for a ballet. The story breathes the warm atmosphere of Andalusia, and tells of a miller and his beautiful young wife, their flirtations and intrigues, and the trickery that ensues when the couple is visited one day by the magistrate (whose three-cornered hat symbolizes his authority). The magistrate quickly develops an eye for the beautiful young wife. He orders the miller arrested to clear his own path to the wife, but his flirtation ends in humiliation when he falls into a stream. The magistrate lays out his clothes to dry, and the returning miller discovers them and puts them on, then sets out in pursuit of the magistrate’s wife. It all ends happily: the police rush
David Rockefeller (1915-2017)

2023–2024 Peggy Rockefeller Concert Donors

The concert series was founded in 1958 by Professor Theodore Shedlovsky and renamed in 1996 in memory of Peggy Rockefeller, wife of longtime chair David Rockefeller. The Rockefeller University gratefully acknowledges the following contributors who make it possible for us to offer affordable tickets for every performance, as well as subsidized tickets for students and postdoctoral fellows:

IN MEMORIAM

David Rockefeller (1915-2017)

Lead Benefactor

George and Gail Hunt Reeke

Sponsor ($500 - $999)

Richard and Deborah Lifton
Tammany A. Patrick
Estelle Irene Young, M.D.

Advocate ($250 - $499)

Mary D. and John C.M. Brust
Steven and Rosalie David
Lisa Kole
Leanne Lachman
Norbert Lanners

Patron ($100 - $249)

Joan and Neil Barkin
Donna Barreiro
Jonathan D. Beard
Martin Bell
Jo F. and Arthur E. Brown
Rochelle Cohen
Maureen K. Clancy
Irene Drivas
Joan Dunham
George Drummond
John Freund
Elaine Goldhill
Joan Dunham
Karen Gotschlich

Friend (up to $99)

Elizabeth Adams
Tema Blackstone
Carmen Bowser
Rosemarie Burchardt
Sheri Chromow
M. Jean Connolly

As of January 12, 2024
The Rockefeller University

The Rockefeller University is one of the world’s foremost institutions dedicated to research and graduate education in the biomedical sciences, chemistry, and physics. Founded by John D. Rockefeller, Sr., in 1901 as The Rockefeller Institute for Medical Research, it was the first institution in the United States devoted exclusively to biomedical research. In the 1950s, the institute expanded its mission to include graduate education. It was renamed The Rockefeller University in 1965.

The university’s laboratory-based structure encourages collaborations between disciplines and empowers faculty members to take on high-risk, high-reward projects. No formal departments exist, bureaucracy is kept to a minimum, and scientists are given resources, support, and unparalleled freedom to follow the science wherever it leads.

The Rockefeller University Community
• 70 heads of laboratory
• 200 research scientists
• 210 postdoctoral investigators
• 255 Ph.D. and M.D.-Ph.D. students
• 1,431 alumni
• 1,325 support staff

Acclaimed Scientists
In the course of Rockefeller’s history, 26 of its scientists have been awarded the Nobel Prize; 25 have received a Lasker Award; and 20 have garnered the National Medal of Science, the nation’s highest scientific honor.

At Present, the Faculty at Rockefeller Includes
• 5 Nobel laureates
• 6 recipients of Lasker Awards
• 33 members of the National Academy of Sciences
• 4 recipients of MacArthur Fellowships
• 3 recipients of the National Medal of Science

Some Clinical Concerns under Study
• Aging
• Alzheimer’s disease
• Antimicrobial resistance
• Autism
• Cancer
• COVID-19
• Diabetes
• Epilepsy
• Heart disease and stroke
• Hepatitis
• HIV/AIDS
• Multiple sclerosis
• Obesity, nutrition, and weight loss
• Parkinson’s disease
• Skin diseases
• Vaccine development
• Vision and hearing disorders

The Rockefeller University Hospital
Established in 1910, The Rockefeller University Hospital was the first hospital in the nation dedicated exclusively to patient-oriented investigations. Patients at the hospital are participants in clinical studies that build on basic research findings from Rockefeller laboratories. This allows the university to maintain an unbroken spectrum of research, from basic to clinical.

Groundbreaking Accomplishments
Among the pioneering discoveries at Rockefeller are many seminal advances that have transformed science and reduced human suffering. Scientists at Rockefeller:
• Discovered that DNA is the basic material of heredity
• Developed vaccines against meningitis and pneumococcal pneumonia
• Determined that cancer can be caused by a virus
• Discovered blood groups and ways to preserve whole blood
• Isolated and first successfully tested natural antibiotics
• Developed methadone maintenance therapy for people addicted to heroin
• Developed the AIDS “cocktail” drug therapy
• Showed that an adult brain of a higher species can form new nerve cells
• Discovered an obesity gene and the weight-regulating hormone leptin
• Discovered the dendritic cell, a key regulator of the immune system
• Discovered the molecular mechanisms controlling circadian rhythm
• Developed assays that paved the way for drugs that cure hepatitis C

An Exceptional Place to Learn
Rockefeller’s Ph.D. program offers training in the biomedical and physical sciences. With neighboring Memorial Sloan Kettering Cancer Center and Weill Cornell Medicine, the university also offers one of the nation’s top M.D.-Ph.D. programs. In addition, Rockefeller provides intensive postgraduate training. At any one time, more than 200 postdoctoral investigators conduct research in university laboratories. Rockefeller’s acclaimed Clinical Scholars Program, a three-year master’s degree program, provides a unique opportunity for recent M.D. or M.D.-Ph.D. recipients to begin careers in patient-oriented research. Working with senior faculty members, clinical scholars develop and implement translational research studies at The Rockefeller University Hospital.

Infrastructure that Fosters Collaboration and Interaction
Rockefeller invented the modern bioscience institute, and has spent the past 122 years perfecting it. The university’s beautifully landscaped 16-acre campus includes nine research buildings containing roughly 500,000 square feet of laboratory space, where investigators employ the latest technology to answer the most challenging questions in their fields. The Stavros Niarchos Foundation–David Rockefeller River Campus, which opened in 2019 and features the Marie-Josée and Henry R. Kravis Research Building, provides a number of new amenities, including additional cutting-edge laboratory space, a river view dining commons, academic and conference centers, and magnificent rooftop gardens.

The Rockefeller University is an independent, nonprofit institute that relies on a broad base of government and private support to advance its mission of biomedical research. Each year, a committed group of individuals, foundations, and corporations helps to fund the university’s scientific and educational programs. For information about these programs, or to discuss ways in which you can support and advance the work of the university, please contact:
