**Camille Thomas**
Cello

**WITH**

**Roman Rabinovich**
Piano

TUESDAY, MARCH 29, 2022  |  7:30 P.M.
WEBCAST LIVE FROM CASPARY AUDITORIUM

---

**Program**

**Maurice Ravel (1875-1937)**
Kaddish

**Frédéric Chopin (1810-1849)**
Sonata for Cello and Piano in G Minor, Op. 65
- Allegro moderato
- Scherzo
- Largo
- Finale. Allegro

**INTERMISSION**

**Sergey Rachmaninoff (1873-1943)**
Sonata for Cello and Piano in G Minor, Op. 19
- Lento – Allegro moderato
- Allegro scherzando
- Andante
- Allegro mosso

---

**Featuring**

Camille Thomas, cello

The young Franco-Belgian cellist, Camille Thomas, understands art’s power to bring people together. Her charismatic artistry is driven by a desire to inspire others to open their hearts to the wonder and emotion of classical music. “Music gives hope for the beauty and greatness of the human soul,” she says.

Ms. Thomas is conquering the world stage at a staggering pace. She has already worked with such conductors as Paavo Järvi, Mikko Franck, Darrell Ang, Kent Nagano, Stéphane Denève, and with orchestras such as the Deutsche Kammerphilharmonie Bremen, Academia Santa Cecilia, Staatsorchester Hamburg in the Elbphilharmonie, the Orchestre National de Bordeaux Aquitaine, and Brussels Philharmonic.

Ms. Thomas studied under Frans Helmerson and Wolfgang Emmanuel Schmidt at the Hochschule für Musik Hanns Eisler in Berlin after working with Marcel Bardon and Philippe Muller in Paris, and Stephan Forck, also in Berlin.

Camille plays the Stradivarius “Feuermann” (1730) thanks to the generosity of the Nippon Music Foundation. She uses a bow by Eugène Sartory kindly on extended loan from the Fondation Roi Baudoin.

Roman Rabinovich, piano

Roman Rabinovich is the winner of the 12th Arthur Rubinstein International Piano Master Competition. He has performed throughout Europe and the United States in prestigious venues such as Leipzig’s Gewandhaus, London’s Wigmore Hall, the Great Hall of Moscow Conservatory, Cité de la Musique in Paris, and the Kennedy Center’s Terrace Theater in Washington, D.C.

Mr. Rabinovich’s 2020-21 highlights include performing Berg’s Kammerkonzert with violinist Kolja Blacher and the Scottish Chamber Orchestra, solo recital tours in the United Kingdom and the United States, including a three-concert Haydn Day in Wigmore Hall, and his debut at the Lofoten Piano Festival.

Mr. Rabinovich made his Israel Philharmonic debut under Zubin Mehta at age 10, having immigrated to Israel a year before from Tashkent, Uzbekistan. He was the first of three young pianists to be championed by András Schiff, who selected him for his Building Bridges series. He has performed with all the major Israeli orchestras, Orchestre de Chambre de Paris, KBS Symphony, Prague Symphony, Buffalo Philharmonic, and many others.

---

Program and personnel subject to change.
Camille Thomas is represented by Frank Salomon Associates. Roman Rabinovich is represented by Artists Management Group, Inc.
Piano by Steinway & Sons.

WINTER-SPRING 2022
PEGGY ROCKEFELLER CONCERT DONORS

The concert series was founded in 1958 by Professor Theodore Shedlovsky and renamed in 1996 in memory of Peggy Rockefeller, wife of longtime chair David Rockefeller. The Rockefeller University gratefully acknowledges the following friends, whose contributions help make it possible for us to offer this concert free of charge for all attendees:

IN MEMORIAM
David Rockefeller (1915-2017)
Lead Benefactor
George and Gail Hunt Reeke
Benefactor ($1,000+)
Lynda Gould in Memory of Pearl Rosenthal
Lee and Nancy Keet
Sponsor ($500 - $999)
Richard and Deborah Lifton
Elizabeth R. Miller and James G. Dinan
Michael and Erika Halford
Advocate ($250 - $499)
Susan and Larry Ach
Mary D. Brust, R.N.
Katharine and Peter Darrow
Richard DeScherer
Irene and Dimitrios Drivas
Patron ($100 - $249)
Ellen Aidmoff
Robert Bass
Jeffrey Blau
Barbara Bieber Brous
Dr. Paul B. Brown and Margaret A. Watson
William J. Chirico, Ph.D.
Sheri Chromow
John Clarke
Joel E. Cohen
Rochelle S. Cohen
Philip DiMauro
Julian Dobly
Dr. and Mrs. George Scott Drummond
Alan and Joan Finkelstein
Susan Fitzpatrick and Tom Wyman
Jerome and Lisa Friedman
Katja Goldman
Dr. Kathleen and Emil Gotschlich
Dr. Roger Gould
Stephen Grossberg
Janet Hadler
Michael and Erika Halford

Seth L. Alper and Roberta S. Libeberg
Cynthia Altman
Flo Arwade
Dr. Arleen D. Auerbach
Jeanne Becker
Karen Becker
Bette Behrens
Drucie Belman
Dr. Janice Bitetti
Jacqueline Bromberg
Barbara Carline-LeBlew
Ruth Carlson
Mathieu Chaldebas
Maida and Harold Cherry
Ann Cohen
Esther Cohen
Steven Cohen
David Cornelius
Rick and Nancy Davis
Jane and Marvin Deckoff
Nola Deutsch
Patricia Donohue-Porter
Pamela Drexel
Sally Dwek
Vincenzo Echerini
John Enoch
Meryle Evans
Stuart and Rosalie Feldman
Arlene Ferris
Dr. Adriana Friedman
John Gerlach
Richard Gilbert
Rowann Gilman
Dr. Joel and Mrs. Phyllis Gitlin
Ellen Golden
Janet Goldstein
Leslie Gottlieb
Patricia and Antony Gravett
Charlene A. Green
Abby J. Greenberg, M.D.
Dr. Heidi Greschik and Christian Farrar
Cynthia Griffin
Sharon Gurwitz
Gary Hack
Norton and Carol Hadler
Martha Hagood
Nancy Haneman

Friend (up to $99)
Bruce Hansen
Dr. Susan R. Harris
Lesley Heller
Jonina Herter
Lea Hertzberg
Carolee E. Hildenbrandt
Franklin Hoke
Elizabeth Horn
James Hurley
Jane Jones
Joanna Jong
Gabriele Kende
Wendy Keys
Annette Kimball, M.D. and Thomas Weaver
Richard Klugherz
Barbara Koppel
Betty Krasne, Ph.D.
Edie Langer
Patricia Laurence
Dr. Leon M. and Fern Lerner
Karen Lichtig
Toni Liebman
Simin Liu
Thomas Lukas
Doris Master, in Honor of Merwin Kilmam
Rosemarie McIntyre
Maryman McNamara
Ernestine Miller
Margaret Monahan and Roland Bopp
Michael Moskowitz
Linda Musser
Jane Ullman Nadler
Terece Nakano, Ph.D.
Mr. James Neufeld
Laurie Plotkin

As of March 29, 2022
THE ROCKEFELLER UNIVERSITY

The Rockefeller University is one of the world’s foremost institutions dedicated to research and graduate education in the biomedical sciences, chemistry, and physics. Founded by John D. Rockefeller, Sr. in 1901 as The Rockefeller Institute for Medical Research, it was the first institution in the United States devoted exclusively to biomedical research. In the 1950s, the institute expanded its mission to include graduate education. It was renamed The Rockefeller University in 1965.

The university’s laboratory-based structure encourages collaborations between disciplines and empowers faculty members to take on high-risk, high-reward projects. No formal departments exist, bureaucracy is kept to a minimum, and scientists are given resources, support, and unparalleled freedom to follow the science wherever it leads.

The Rockefeller University Community
- 70 heads of laboratory
- 200 research scientists
- 300 postdoctoral investigators
- 200 Ph.D. and M.D.-Ph.D. students
- 1,355 alumni
- 1,325 support staff

Acclaimed Scientists
In the course of Rockefeller’s history, 26 of its scientists have been awarded the Nobel Prize, including 7 in the last 22 years alone; 25 have received the Albert Lasker Medical Research Award; and 20 have garnered the National Medal of Science, the nation’s highest scientific honor.

At Present, the Scientific Staff at Rockefeller Includes
- 5 Nobel laureates
- 8 recipients of the Albert Lasker Medical Research Award
- 36 members of the National Academy of Sciences
- 4 recipients of MacArthur Fellowships
- 5 recipients of the National Medal of Science

Some Clinical Concerns under Study
- Aging
- Alcoholism and drug addiction
- Alzheimer’s disease
- Antibiotic resistance
- Autism
- Cancer
- COVID-19
- Diabetes
- Heart disease and stroke
- Hepatitis
- HIV/AIDS
- Multiple sclerosis
- Obesity, nutrition, and weight loss
- Parkinson’s disease
- Skin diseases
- Vaccine development
- Vision and hearing disorders

The Rockefeller University Hospital
Established in 1910, The Rockefeller University Hospital was the first hospital in the nation dedicated exclusively to patient-oriented investigations. Patients at the hospital are participants in clinical studies that build on basic research findings from Rockefeller laboratories. This allows the university to maintain an unbroken spectrum of research, from basic to clinical.

Groundbreaking Accomplishments
Among the pioneering discoveries at Rockefeller are many seminal advances that have transformed science and reduced human suffering. Scientists at Rockefeller:
- Discovered that DNA is the basic material of heredity
- Developed the influenza vaccine and vaccines against meningitis
- Determined that cancer can be caused by a virus
- Discovered blood groups and ways to preserve whole blood
- Isolated and first successfully tested natural antibiotics
- Developed methadone maintenance therapy for people addicted to heroin
- Developed the AIDS “cocktail” drug therapy
- Showed that an adult brain of a higher species can form new nerve cells
- Discovered an obesity gene and the weight-regulating hormone leptin
- Discovered the dendritic cell, a key regulator of the immune system
- Discovered the molecular mechanisms controlling circadian rhythm
- Developed assays that paved the way for drugs that cure hepatitis C

An Exceptional Place to Learn
Rockefeller’s Ph.D. program offers training in the biomedical and physical sciences. With neighboring Memorial Sloan Kettering Cancer Center and Weill Cornell Medicine, the university also offers one of the nation’s top M.D.-Ph.D. programs. In addition, Rockefeller provides intensive postgraduate training. At any one time, some 300 postdoctoral investigators conduct research in university laboratories. Rockefeller’s acclaimed Clinical Scholars Program, a three-year master’s degree program, provides a unique opportunity for recent M.D. or M.D.-Ph.D. recipients to begin careers in patient-oriented research. Working with senior faculty members, clinical scholars develop and implement translational research studies at The Rockefeller University Hospital.

Infrastructure that Fosters Collaboration and Interaction
Rockefeller invented the modern bioscience institute, and has spent the past 120 years perfecting it. The university’s beautifully landscaped 16-acre campus includes nine research buildings containing roughly 500,000 square feet of lab space, where investigators employ the latest technology to answer the most challenging questions in their fields. The recently completed Stavros Niarchos Foundation–David Rockefeller River Campus, featuring the Marie-Josée and Henry R. Kravis Research Building, provides a number of new amenities, including additional cutting-edge lab space, a river view dining commons, academic and conference centers, and magnificent rooftop gardens.

The Rockefeller University is an independent, nonprofit institute that relies on a broad base of government and private support to advance its mission of biomedical research. Each year, a committed group of individuals, foundations, and corporations helps to fund the university’s scientific and educational programs.
